

Emissions Inventory Notes

1. Findings

The bullet points under the findings section were organized narratively in the following format:

1. Introductory paragraph on ReFresh Milwaukee.
2. Current programs and initiatives
3. Current tracking and inventory efforts
4. Challenges to these tracking efforts
5. We Energies paragraph

2. Recommendations for Plan and Planning Process

The bullet points under Recommendations for Plan and Planning Process were organized narratively in the following format:

1. Paragraph on the GHG inventory, the focus of the inventory, the need to continue working to receive emissions data, and the need to create the GHG inventory in a narrative format.
2. Paragraph on the development of a Milwaukee Climate and Equity Action Plan
3. The remaining bullet points did not seem as though they required separate paragraphs, so they were kept as bullet points with an introductory sentence.

No edits were made to the table.

3. Short Term Projects/Programs

There were no substantial changes made as this section already flowed narratively.
