Hello,

I am a constituent in this area. I am a hard working, tax paying citizen with plans and hopes for a family. I wish to say that I am vehemently opposed to a data center of any kind on this land. The damage to land, water, and environment is immense and detrimental to future generations. If this passes, I will spend any and all time to make sure all parties responsible will be replaced in office come midterms and future elections.

It is our duty to protect our lakes and our people, and Data centers have no place in our community.

Thank You,
-Lauren H, Concerned citizen
