

1. Describe the proposed ordinance or resolution. File number: _____

(CCFN 250761) Resolution relative to acceptance and funding of a subaward of the Midwest Frontline Fund's Great Lakes Thriving Communities Grantmaking Program through the Sherman Park Community Association in support of the Environmental Collaboration Office's Healthy Homes & ECO Neighborhoods Project.

2. Identify the anticipated equity impacts, if any, of this proposal.

This project provides education and resources for residents living in neighborhoods that have historically been underserved. The project targets low-to-moderate income homeowners of old, deteriorated housing who experience high environmental, energy, and health burdens.

3. Identify which minority groups, if any, may be negatively or positively impacted by the proposal.

The Healthy Homes & ECO Neighborhoods Project is positively impacting the 53210, 53216, 53208, 53206, 53209, 53204, 53207, and 53215 zip codes, which are predominately low-income and historically underserved neighborhoods.

4. Describe any engagement efforts with minority communities potentially impacted by the proposal.

The purpose of this grant is to support ECO's Healthy Homes & ECO Neighborhoods Project to expand awareness of and access to local and statewide housing improvement programs and federal funding sources through collaborative outreach and marketing efforts and by funding home energy and healthy home assessments for residents living in historically disinvested neighborhoods on the north and south sides of Milwaukee, where lack of access to affordable, healthy, climate-resilient housing is most pervasive.

5. Describe how any anticipated equity impacts of the proposal will be documented or evaluated.

Because the project is limited to the previously mentioned zip codes, the measures/outputs listed below will be used to evaluate our equity impact.

*-Energy and Healthy Homes Assessments: 36
-Community Outreach Events Attended: 12
-Community Engagement Meetings Hosted: 4*

6. Describe strategies that will be used, if any, to mitigate any anticipated equity impacts.

Resources will be provided in both English and Spanish to mitigate language barriers. The project engages diverse partners from environmental and health nonprofits, faith-based organizations, and local government through grassroots efforts to more effectively distribute resources to target audiences.
