**Subject:** Proposed 1887 On Water-Rule Development

Dear Kristin,

I am a brand-new resident of Riverbridge Condominium and I oppose the 1887 on Water development for several reasons:

1. The physical site is too small to accommodate the number of units proposed, which concerns me that it will be too close in proximity to the building I live in at 1905N Water St Riverbridge.
2. I feel that this development would have an impact on an already limited parking availability for both residents and visiting guests.
3. Not only I'm concerned about the limited parking, but also the impact would have on an already busy street.
4. With the Florida "Seaside disaster "in mind, I am also very concerned about the environmental impact this structure would have on the area.

I would hope that Nik Kovac will do right by his constituents, and that he will **not** recommend this project to go forward, as proposed.

Thank You
