Subject: Citizen Testimony on a Data Center at Midtown

Some people who received this message don't often get email from urpinion@gmail.com. [Learn why this is important](#)

I am against this proposal.

I will actively campaign to have elected officials removed who support this.

These are the ONLY conditions under which I would consider this acceptable:

1. A contractual obligation from local energy companies and MMSD not to spread the cost of this center to the Milwaukee community from now into perpetuity.
2. Any employees hired at the data center must be City of Milwaukee residents - no exceptions.
3. Employees working at the facility must earn a livable wage with healthcare benefits after taxes and copays for benefits.
3. The Data center must contribute twice the value of their published water consumption to the city or county for the purpose of environmental protection and clean up in the immediate neighborhood and those neighborhoods immediately adjacent to the neighborhood.

I will be sharing this message via social media for transparency.

Sincerely,

Ulla Pinion
