

To: The Common Council

From: The Commissioner of Public Works

A report analyzing the revenue generated from oversized/overweight vehicle permit fees, including a comparison of this revenue to 2005 and 2006. This report is required by ordinance 101-5.5-6.

Revenue generated from oversized/overweight vehicle permit fees for calendar years from January 1, 2005 to December 31, 2007 is shown below.

Total revenue by year:

2005	2006	2007
\$345,966	\$455,176	\$419,638

Analysis:

Factors that affect oversized permit revenue;

- Number of permits issued is based on regional construction and manufacturing; as well as shipping volume through the Port of Milwaukee.
- The types of permits and fees for these permits has change four times since October 2001.
- On April 11, 2007 the six month non escorted multi trip permit became an annual permit. A transition period of more than one year is likely necessary to ascertain the effect of this change.
