Subject: Lake Michigan is crying
Date: Sunday, May 17, 2026 9:52:53 AM

Some people who received this message don't often get email from lydiapruhs@gmail.com. [Learn why this is important](#)

I took these pictures of the Lake yesterday. Bradford was super busy and look how pretty it was! I will attach the pictures of the Lake for you to hopefully appreciate. Please hear her crying to leave her alone!!

She would much rather lend her water to a day of swimming at the beach rather than being sucked dry for something with the word “artificial” in its name.

On that note, I find it so ironic that something “artificial“ may end up killing our community in a very real way.

Please rethink what is starting to feel like your forced inevitability of the proposed data center.

Sincerely
An advocate for Lake Michigan
