Description:

****No SWMBE Form is attached since this is a change order to a funding agreement with the project managed by the City****

Milwaukee will plant trees in the median of North 60th Street, between West Capitol Drive and West Burleigh Street and in the median of West Burleigh Street, between West Appleton Avenue and West Lisbon Avenue. Milwaukee will excavate twenty-one 8-foot wide by 75-foot long Tree Areas in the median between the curbs, installing a 6-inch crushed stone base and approximately 2 feet of drainable soil. The drainable soil will be placed in interlocking load bearing structures. The system will be capped with a cover and topsoil will be placed on the final 1-foot layer. The total amount of Tree Areas to be constructed is approximately 14,025 sq. ft. Milwaukee will plant three trees in each Tree Area. Milwaukee will install a distribution pipe to collect stormwater from the street and distribute it throughout the system. Underdrains will be placed in the bottom to remove excess runoff by connecting a drain to the back of the existing catch basins.
