To the city commissioner,

We are concerned citizens writing again because neither of us can make it to the coming public meeting held in the middle of the workday. We are writing to express support of keeping the Milwaukee River and vicinity natural, with limited development. We believe the river does best when it is left alone. We are opposed to any paved path construction on the west side of the river, because we would like to keep it smaller, quieter, less destructive, and more suited to pedestrians and locals. We are adamantly opposed to any retail or condo development. This river is one of Milwaukee's only jewels left, and it is only precious because of how wild it still is.

Please consider these requests of law abiding, tax-paying homeowners of the area. We are committed to keeping the neighborhood strong and healthy.

Sincerely,
