I am submitting this without  
the Videos, I will send it, should you  
need it. The City of Milw, Manager  
over the Plumbers, has the Video,  
and you can see how deep  
the water is.

RE: 2340 N 12th Street Milwaukee WI.  
Claim for damaged hot water heater  
and the furnace

To: City Clerk  
Claims Department  
200 E. Wells Street rm. 205  
Milwaukee WI 53202

My plumber found that the service pipe  
had been broken before the meter, and that

Milwaukee.

Water has covered the floor and the furnace and the hot water heater is floating in water.

The City of Milwaukee, sent plumbers, 3 weeks later, so in the meantime, the tenants are freezing because the sponsor for the tenants called we energy and had the services turned off. The furnace and hot water heater is Ruined. I'm requesting the city Of Milwaukee to replace both. They could have done more. Even after they did their work, they left water knee deep in the basement. A Hanging extensions cord in water. I have pictures and a video.

I am requesting the city to put me back, like kind and quality. Which means, I am requesting City of Milwaukee to replace,

Who should fix it

Me or the city

Yup the city have to fix anything coming from ground ...

This is his response to your question.
