5. DESCRIPTION OF PROJECT:

Tell us what you want to do. Describe all proposed work including materials, design, and dimensions. Additional pages may be attached via email.

This project is for the North Shore Bank tenant at the front of the El Rey Food Mart. North Shore Bank is an existing tenant. They currently receive heat and air conditioning to their space from a large HVAC unit which serves the El Rey Food Mart. There is a remodeling project happening in the bank area and they have asked to have an independent HVAC unit installed for their space so they can have better control of their temperature. We have proposed to install (1) small Carrier rooftop HVAC unit on the roof above the space, with ductwork distribution down into the bank.

Attached are:

- HVAC floor plans of the proposed design
- Elevation drawing showing location of new Carrier rooftop unit
- Dimensional drawings of Carrier rooftop unit
- Areal view of roof showing location of unit
- Photos of the area on the roof where the new unit will be located

It will not be possible to see the new rooftop unit from anywhere on the ground. It is completely hidden behind a tall roof section and a parapet wall. Currently there are many HVAC units located on this roof. The unit we are proposing would be smaller than most of the equipment on the roof at this time.
