**WALL SECTION**

**SCALE: 3" = 1'-0"**

- \*ALL TRIM SHOULD BE CLEAR, SMOOTH WOOD THAT IS FREE OF SAPWOOD AND OF A NATURALLY DECAY RESISTANT SPECIES INCLUDING RED CEDAR, WHITE CEDAR, REDWOOD, CYPRESS, WHITE OAK AND HALDOGAN.
- \*IF PINE IS USED IT SHOULD BE CLEAR, SMOOTH EASTERN WHITE PINE WHICH HAS MODERATE DECAY RESISTANCE. WESTERN PINE ARE NOT RECOMMENDED BECAUSE THEY ARE HIGHLY SUSCEPTIBLE TO EARLY DECAY IN AN OUTDOOR INSTALLATION.
- \*FLAT TRIM AROUND WINDOWS AND DOORS, THE CORNER BOARDS, FINICE BOARDS, AND FINING CORNICE BOARDS ARE ALL 5/4" THICK.
- \*PLEASE NOTE THAT QUARTER SAWN WOOD WILL LAY FLATTER, HOLD PAINT BETTER AND GENERALLY LAST LONGER THAN PLAIN SAWN WOOD OF THE SAME SPECIES.
- \*RADially SAWN (A TYPE OF QUARTER SAWN) EASTERN WHITE PINE OR SPRUCE CLANGARBS ARE RECOMMENDED.
- \*RESEARCH HAS SHOWN THAT WHEN NEW, SARE WOOD IS LEFT EXPOSED TO THE EXTENSION ELEMENTS FOR A PERIOD DAILY A WEEK OR TWO, THE LIFE OF THE PAINT JOB APPLIED TO IT IS LIKELY TO BE DECREASED. PRIMING AND PAINTING WOOD PRIOR TO INSTALLATION CAN INCREASE THE LIFE OF THE WOOD AND THE FINAL PAINT JOB.
