

November 30, 2020

George Lewis
1826 N 19th St
Milwaukee WI 53205

Dear George,

This letter is to confirm that, based on our post-remediation verification inspection and the analysis of air samples collected on November 11, 2020, the mold remediation in the basement of your residence was completed successfully, congratulations!

Your recent lab report dated November 12 from Hayes Microbial Consulting, an accredited microbiology lab (EPA #VA01419), showed that mold ecology in that area of the home was back to normal with mold counts substantially lower than outdoors and no water-damage indicator molds present. I have enclosed a copy of the lab reports with this letter.

It was great working with you on this project. Feel free to contact me via email or by phone should you have any questions.

Sincerely,

A handwritten signature in black ink that reads "Martine Davis". The signature is written in a cursive, flowing style.

Martine Davis, BBEC
Certified Building Biology Consultant
