RE: C.I. File No: 03-S-356

To Whom It May Concern:

I'd like to appeal your decision on the denial of my reimbursement for the damages to my 1989 Lincoln Continental.

In the letter you sent to me you stated that my car was already damaged. The only damage was to the windshield, which was on the intake form that I signed when I picked up my vehicle.

You also stated that on the intake video it was clear that the tire was leaning against the wheel, which couldn't be possible when the tire and the wheel are one in the same. If the intake video showed this then why wasn't it also note on the intake form and reported to me by the receptionist who released my vehicle and inquired about the windshield

. You also stated that I didn't report any damage at the time of pick-up, I walked to my car that was already started and not up to it, so I didn't think to look for any damage. I also never thought to think that my vehicle would possibly be damaged in the city's possession. I picked my vehicle up at about 1:15 and I called to report the damage as soon as I got home which the phone records should show, which was about 1:45 at this time I spoke with operator 100, who instructed me on what I need to do.

From my understanding the contractor's you hire are independent contractors so therefore should have prior experience in towing of vehicles. But apparently the contractor who, towed my vehicle was careless in his hast to tow my vehicle or didn't want anyone else to be paid for his time, so he took it upon himself and towed my vehicle incorrectly.

Any knowledgeable professional should be aware that you can not tow a vehicle with air shocks from the front nor back unless the switch located in the trunk is turned to the off position, which my was not.

So therefore I would like to appeal your decision based on these facts that are true and correct to the best of my knowledge.

Respectfully yours,

Teasha Harris

CITY ATTORNEY

ON May 8th my car was towed I went and picked it up at about 1:15p.m. While driving the car home I noticed that my car seemed to be sitting a little higher than then usual, so when I got home I left the car running and got out to look the front was really jacked up. I called the tow yard and explained to the operator what was wrong. The operator said I needed to bring the car back to be looked at. ON my way back I got to 6th and North Avenue as I turned the corner my car made a loud popping sound and fell down in the front on the drivers side. As I pulled over to the side the passenger side did the same. So I pulled over turned off the car and turned it back on and the dash board started flashing side control.

I pulled off, went back home and called back to the tow yard. at this time I spoke with operator 100 she explained that I had to go to the City Attorney's office and put in a claim. The receptionist at the office told me to call the City Clerk. I spoke with the city clerk and was told to send two estimates and a description of what happened.
