To the Public Improvements Committee

Dear Honorable Members:

The City of Milwaukee owns and maintains an existing sewage lift station located in the right-of-way of West County Line Road about 35 feet south of the roadway and approximately 1,500 feet west of North Swan Road. The lift station receives primary electric power from utility transmission lines and has no secondary power source.

The Department of Public Works wishes to construct and maintain a generator next to the sewage lift station as a secondary power supply. Other secondary power alternatives have been considered and were found to be infeasible. Though the generator, as proposed, would be considered a non-typical use of the public right-of-way, we believe it will not have an adverse impact on the right-of-way or neighboring properties. We have prepared the attached substitute resolution that, if adopted, would give special permission to the Department of Public Works to construct and maintain the generator.

Thank you for your consideration of this substitute resolution.

Very truly yours,

Jeffrey S. Polenske, P.E.
City Engineer

Mariano A. Schifalacqua
Commissioner of Public Works
