Dear City Plan Commission,

I reside in Oak Creek, WI, in Southern Milwaukee County. AI innovation and AI-enabled service advancements are part of our lives now, and I urge you to weigh the ethical, environmental, moral, physical, and fiscal requirements for this type of storage and compute infrastructure very carefully. With thousands of data centers already being built across our country, it is paramount that the fundamental needs for healthy foods, clean drinking water, electricity, and housing remain affordable and accessible for all people in our country. Data centers are increasingly known to overburden and destroy local water and electricity infrastructure, diminishing the quality of life and living conditions for millions of people. Please read a recent article on just one of these data centers below.

Thank you for your consideration,

Daniel Fuhrmann

Oak Creek, WI 53154
