Subject: Solar in Milwaukee

Alderman Bauman,

I'm happy to see you fighting against WE Energies only pushing clean energy when they stand to profit. It also thrilled me to see you mention the Paris Climate Accord and how it's a moral issue, in City business of all places. As a city dweller who has worked hard (without success yet, unfortunately) to have our tower Association put up solar panels and electric car chargers, the next best thing is for the City to do it.

Thank you!
