I work in the area of the proposed data center at an elementary school. The community I serve is disproportionately affected by asthma, lead exposure, and exposure to smoking. The last thing these children need is a center devoted to depleting the city of clean water and air. Also artificial intelligence enables the struggle that many of these children are facing in learning to read, write, etc. This community needs a lot of things, but an ai data center is not one them!

Thank you,
Alani Pierre
