204 W Brown is a three story 3,800 sf single-family home. It was previously a duplex and was converted to a single family when renovated by the current owner. The lot is zoned RT4 and sits on a corner lot that is 65' wide by 100' long in the north-south direction. The owner's family is growing in the house and needs to find more space for kids bedrooms. Currently the house is a 4 bed 2.5 bath and the desire is to expand the interior into the third floor of the house adding two bedrooms to the third floor. A new dormer is required for a second bedroom. One internal stair already extends to the third floor and due to the residential building code requirements the owner will need to provide a second exit from the third floor by means of a new egress stair. The north side of the house will also have an addition on the first floor allowing for a mud room with laundry and an enlarged pantry off the existing kitchen. This 12'h x 22'w addition will only occur at the first floor, the second floor and roof of this addition will contain a new deck off the master bedroom. The owner can then discharge their exterior exit stair at this level. All new exterior materials will build upon the pallet and match those that currently exist on this house. The addition on the dormer is consistent with other corner homes within this district. Decorative gables exist on the north and south sides of the house, this detail will be carried along with similar materials to the new eastern facing dormer. Other than exterior paint, no other exterior improvements are being considered at this time.
