Good Evening,

I am reaching out to voice my disapproval of the proposed AI data center in Milwaukee's Midtown Center. I have to admit I am extremely against the proposal. I do not live in the area, I actually live in West Allis, but I do drive through the area on occasion while commuting to visit friends/run errands/and go to work. I am against the proposal because I have heard stories about other communities across our country that have been impacted negatively after an AI data center has been constructed near them. I care about the folks in my community and communities near me. There is so much evidence available proving how AI is harmful to our planet. Here are a few articles I strongly encourage you to read:

<https://www.greenpeace.org/international/story/82486/ai-energy-environment-democracy/>

<https://www.environmentalhealthproject.org/post/the-dangers-of-data-centers>

<https://www.consumerreports.org/data-centers/ai-data-centers-impact-on-electric-bills-water-and-more-a1040338678/> .

You may think “ah well...we live in the city—there is so much noise all the time, and the water is already bad” but why make it worse? Why build something that is going to continue the degradation of our planet and why build something that people in your community have voiced disapproval of? In my opinion, if you proceed to build the data center in Midtown, it shows that you lack compassion and a true desire to see the area flourish. It appears to me you were offered a cheap and low-maintenance way to generate money from the lot. It appears you do not care about folks that would be negatively impacted by the construction of an AI data center. Please listen to those that speak on the 29th. Please show some form of empathy and reconsider this proposal.

Thank you for your time,

-Faith Smith
