

April 12, 2005

To the Honorable, the Common Council

Dear Council Members:

Attached hereto is a request from the Infrastructure Services Division for a variance from procedure in Common Council Resolution File No. 881665 adopted December 20, 1988, which would allow additional appropriations to the 2005 capital budget assessable account as indicated below:

| | | |
|--|-------------|-----------|
| Water Main Construction Project Grant Account | WT420050000 | \$325,000 |
| | TOTAL | \$325,000 |

At the time the 2005 budget was approved, no assessable projects were anticipated. Since then, the Canal Street project from North 25th Street to Miller Park requires installation of assessable water main.

Transmitted, herewith, in resolution form, is such a request which, if granted, would authorize the additional appropriations in the account and amount specified above.

We hereby recommend approval of the attached request.

Respectfully submitted,

Special Deputy Commissioner
of Public Works
