Some people who received this message don't often get email from rachlynn.wagner@gmail.com. [Learn why this is important](#)

To whom it may concern:

I am not sure what is going on with our state. But the incessant want to, that's build these data centers everywhere, is it? Terrible idea.

Has nobody done the research to show? How the runoff is going to affect the surrounding communities, not just with less water pressure. But with cancer causing chemicals entering their ground water.

Stop forcing our state to have all of these data centers that are gonna hurt Lake Michigan.

The money is not worth it, when you look at how much this will negatively affect the community's health, and right to live, and access to clean water.

Please do better research; this is insane.
