INDIGENOUS COMMUNITY BUILDING/ADVOCACY

Athlete, Rostered Skater
2016 - present

Team Indigenous Roller Derby World Cup
North America/American Samoa/New
Zealand

- Assisted in development of emerging team's formal mission statement
- Rostered skater athlete of the inaugural "emerging team" for the Roller Derby World Cup

Community Participant
2015 - present

The Teaching Lodge, Milwaukee Indian Community School
Franklin, Wisconsin

- Attended cultural workshops and traditional storytelling classes taught by knowledge keepers from various Wisconsin/Great Lakes Native communities

Literary Program Co-Director
2002 - 2006

Native American Community Center (defunct)
San Francisco, California

- Coordinated monthly literary performances of local artists and visiting literary artists
- Managed media promotional material and worked with local venues to provide performing spaces

WORK EXPERIENCE

Project Environmental Engineer
2015 to present

Arcadis U.S., Inc.
Milwaukee, Wisconsin

- Managed several initial environmental site assessments and trained new personnel, led expansion of client service offerings into Midwest region. Current lead of technical investigation teams of troubleshooting and upgrades on oil & gas client treatment system
- Managed the operational enhancement of a cutting-edge hybrid remediation system to finalize a \$700M real estate transaction under project schedule.
- Analysed treatment efficiency to provide recommendations for system demolition after meeting remediation objectives. Provided rigorous operations and maintenance data tracking, troubleshooting, and repairs with onsite technician team.

Associate Project Manager
2010 - 2015

Arcadis U.S., Inc.
Houston,
Texas

- Led expansion of strategic consultant services for exclusive Tier 1/Fortune 5 energy sector client, growing new global real estate sector account from \$30K to \$3M by providing project management services
- As a client-embedded manager, implemented global, regional, and client objectives including project management, legal records management, compiling performance indicators, analyzing operational metrics, and developing the training program for project managers and other consultants.
- Main host and organizer of annual client conference for operational integrity

Staff Environmental Engineer
2006 - 2010

AMEC/Geomatrix, Inc.
Oakland, California

- Analyzed remedial system performance to reduce concentration of highly corrosive system consumable leading to cost savings and increased personnel safety
- Analyzed feasibility study and calculated construction and operation costs of remedial alternatives
- Performed engineering oversight of cutting edge, two-tiered remedial excavation and backfill, while monitoring for highly toxic contaminants in soil

Environmental Engineer
2003 - 2006

Questa Engineering Corp.
Pt. Richmond, California

- Designed innovative systems for installation of single-residence wastewater treatment systems in technically-challenging locations with severe design constraints. Designed resourceful combined stormwater management and wastewater treatment and recycled water discharge systems to allow development of new subdivisions. Creatively utilized soil-moisture water balances to minimize development footprint.

- Became subject matter expert for cutting-edge recycled water technology to maximize proposed subdivision expansions. Expertise included technical specifications and regulatory environment.

Junior Civil Engineer

2002 – 2003

Marin Municipal Water District

Corte Madera, California

- Served as municipal intermediary with the Public Works and Fire Departments of eight cities and the county and other stakeholders. Negotiated utility conflicts and locations of proposed appurtenances
- Implemented the upgrade of eight capital improvement and fire flow master plan projects averaging 1,500 lf of water main rehabilitation in cities and county unincorporated areas for approval by publicly-elected Board of Directors

Junior Engineer

2000 – 2001

First Nations Engineering Services, Ltd.

Ohswegen, Ontario, Canada

- Performed engineering oversight of construction of membrane-filtration water treatment plant, including pump lift station, in rural indigenous community
- Performed engineering oversight of 5,000 meters of roads, culverts, sidewalks, and water main of 66-lot subdivision in rural indigenous community
- Prepared capital planning studies of proposed civil infrastructure projects, projecting growth and future needs of four indigenous communities of varying sizes. Work included conducting meetings with indigenous community elders to preserve culturally sensitive land areas
