Subject: No data center

Some people who received this message don't often get email from tmanz5225@gmail.com. [Learn why this is important](#)

Good morning,

I'm a citizen of Milwaukee county and I vehemently oppose this proposed data center in Sherman Park. There is no need for a data center, especially not on the same plot of land as the proposed library and community center. Data centers destroy the environment and steal desperately needed water resources from citizens.

There may be temporary jobs initially, but there will be little to no long term jobs for the community. Utility bills are already 20%-30% higher than the same time last year for similar usage amounts. Citizens CANNOT and should not be forced to have another increase for a data center that they do not want! Please do not approve this project. Give us the library and community center that would provide long term jobs and enrich the community.

Sincerely,
Tracy Risse
