

Project - Restoration of outdoor pool. I plan on excavating the reflecting pool to allow 15 inches of water to remain. (City of Milwaukee code calls for a perimeter fence if the depth is more than 18 inches). I plan on using a dyed concrete with a flat black finish to enhance the reflective nature of the pool. The original concrete edges of the pool and top surfaces will remain in place. The existing rusted pool access hatch with either be removed or restored depending on its condition.

Photo of current condition of filled-in pool area.

Original pool as it looked in the 1920s.

Aerial view of pool and property from 1920s
