Subject: Declined: MKE Community Impact Committee Meeting

Chris –

As an FYI, I am unable to attend the meeting tonight, and Bill is out of the office today. I would note a couple of things for the committee, should they come up. And I'm happy to chat with whoever offline if needed.

- 1) We can provide the committee with better counsel on what we can assist with once we know what they want us to do, specifically, and under what timeline. I suspect some things we might be able to help with, others we may not.
- 2) I wanted to make sure the committee knew that if they wanted to go the survey route (print, digital, or otherwise), we could assist in creating the medium, but we would not be the ones creating the actual wording of the survey. That would have to come from the committee. We would take their content and have it ready to print/exist digitally, etc...
- 3) The same goes for something like a website, for example. We could assist in getting one stood up, but we'd need content to populate the website. Such as their guidelines, action items, contact info, etc...

Hope that helps. And I can certainly answer any questions as best I can after the meeting, should there be any.
