those pic are for the present and should be all clean and impeccable here for the kind of rent the we pay here out of packet (\$1675)they change management here more, then what they do and don't be late with rent cause instantly you have the 5 days notice at your door.like I read in a review here is more the profit then have a good living Space. They worry more for little things then actually was going on here overall.

This is very unsafe place to live that's is third shooting in less them a month,and look like owners and managers don't do anything about it...

Is so bad here in this apartment complex not safe at all a lot going on around here,and is not the management or the apartment I live here for 4yrs already and before it was not like now. Am catching up with some rent to find my way out off here. Cause is bad shooting,fight and etc etc.so sad cause apartment interior are nice.

If you like to live around constant gunfire, this is the place for you! We have had 2 homicides at this complex in the last 3 months alone. There have been several other shooting incidents and near constant police presence. It has been declared a chronic nuisance by the city of Madison.

The owners have promised to make changes, but nothing has ever happened. Now, a 15-year old girl is dead because their profit comes before the safety of their residents. Stay away from this place if you value your life - they certainly don't care about your safety and well being.

Roaches can be seen crawling in the hallways, staircases, etc. trash everywhere it's disgusting. The biggest mistake was placing large garbage cans in the garages. People are using it as dumpsters and trash is now piling up in the garages. There are mice in the garages, and I'm certain it's from the trash that's left in the garages. This place has so much potential, they're beautiful on the inside and outside. it's just not very well taken care of by residents. Small children as young as 3 are outside alone playing while residents expect others to watch their children. It's impossible to speak with anyone if their child causes harm to your children or damage your property without being threatened, disrespected, etc. the same boys are constantly hitting kids, damaging the garages, playing in the bike rooms where residents bikes are stored. Another shooting and now neighbors are afraid to come outside with their children. There are way too many families especially children living here. This supposed to be a safe space for everyone.
