Subject: Dover Street Project

Dear Alderman,

Please vote against the Dover Street Project, The current plan will distroy my neighborhood. This neighborhood is quiet with home owners fwho invest in their community. This neighborhood is primarily single families . The increase of 90 apartments will put strain on the on the street parking,and increase traffic on the streets. I live across from the school. I see how tis community uses the playground space. Approximately 40 percent is used for parking everyday-more when there is an event. The rest of the playground is used for baseball and basketball. This construction would take away this resource.

Why this project? It cannot be to get Milwaukee teachers.I have done interviews of teachers and other educational professionals. They have do desire to live in Teach Town. This concept was designed to revitalize trouble neighborhoods. This is not a troubled neighborhood. The educational professionals had ideas such as loan forgiveness for working in MPS rather than Teacher Housing.

Why this project ? To make some entity money at the expense off my neighborhood.I attended multiple meetings about this project. Though the planners decreased the apartments by 10 they still left 90. Their plans remove my parking. The plans increase the density of people greater than the current neighbors. Please vote to save my neighborhood.
