To whom it may concern,

As a resident of the Golden Valley area of Milwaukee I was very disappointed when I heard that the city is considering allowing a data center to be built at 60th and Fond du Lac Avenue.

The area is already struggling and depressed and adding the additional issues will not improve for the citizens, specifically:

-immense energy consumption and therefore increase utility rates by pushing grid capacity to its limits.

-routine use of in-site turbines and diesel back up emits NOx linked to cardiovascular and breathing issues.

-ineffective tax breaks, few long term jobs while they receive significant public subsidies.

This area is struggling enough, please don't destroy it further with corporate greed and short term gains.

Respectfully,
Kelly Collins
