Subject: Midtown Center DIZ Overlay testimony

Some people who received this message don't often get email from mulqueenjustice@gmail.com. [Learn why this is important](#)

Hello, my name is Justis Mulqueen and I have lived in Milwaukee all 26 years of my life. I am writing to greatly urge you to *not allow* a data center to be built in the Midtown Center area. It has been shown time and time again with the great uptick of data centers that they cause excess noise, water, light, and air pollution. My community members in the Sherman Park neighborhood deserve clean water and quiet nights. The Milwaukee city plan commission needs to be focused on how to bring more youth centers and grocery stores to the area, not a building that will only worsen the quality of life in the Sherman Park neighborhood.

Milwaukee is known for its fresh water and greenspace. Allowing this data center to be built will only take away from what makes my city so wonderful. I greatly urge you to listen to the community, as Sherman Park neighborhood residents are who will be *negatively impacted* by this build, the community deserves to be heard.

Thank you for your time,
Justis Mulqueen
