

City Clerk  
ATT: Claims  
200 E Wells St Rm 205  
Mikwaukee. WI. 53202

On 4/2/24 in the process of collecting trash, a truck was observed causing damage to our fence along the alley at 6319 W Chambers Street. According to a neighbor who witnessed the accident, once the trash cart was emptied into the truck he failed to put the cart back into its proper place. The driver, unable to see the cart as it was sitting next to the truck, moved forward and dragged the cart against the fence causing multiple areas of damage as outlined in the quote for repair.

It should be noted that the fence was less than a year installed by a custom fence builder. No two companies at this caliber of builder use the same materials, paints, stains, and hardware for their fences. To maintain the look and quality of the fence (it was \$15k to have built and installed) our preference is to stay with the company that did the original work. However, we did submit two quotes for the work. Also, during this time I underwent shoulder replacement surgery, had a reoccurrence of afib (heart issue) and had a set back of my should surgery due to a fracture in my shoulder. We did everything we could to adhere to the due dates of submissions to the city.

A DPW supervisor was informed of the incident the day it occurred and he dropped off the guide to submit to the city. We took pictures that day as did the fence companies.

The total amount we are seeking to repair the fence is \$1340.06.

Thank you

Jim and Jackie Wheelock
