- (1) Binding Mediation and Arbitration Process... In our nearly 45 years and over 10,000 projects we that find us and our clients very happy to have had a meeting of the minds and partnered to create respeatity and durability. In the rare instance where there are disagreements or misunderstandings, we process, with the help of neutral Wisconsin professional associations to help us select a binding arbitratif, for whatever reason, the arbitration process does not lead to a satisfactory resolution, the client value fees and Community will be responsible for its legal fees.
- (2) Lien Rights... We and others who furnish labor and/or materials for this project may have lien ri; paid. Late payment charges of 1.5% per month for past due balances, annual charge of 18%, and, if c guarantees/warranties are null and void.
- (3) Substantial Project Completion... On projects over \$5,000.00 that are substantially complete, (e and the house is not in danger from the elements, but notable to be totally completed for reasons outsi or awaiting the arrival of a small part for a small issue that will take a month to arrive, etc.), we wou minus double the cost of the unfinished item. For example, let's say the contract included a copper one month. If the total project cost was \$10,000.00 and we are finished, except for the weatherva material cost \$500, we would be happy to find you withholding \$1,000 until the weathervane is contract price. Prices may change after 30 days from date of our proposal. Guarantees apply only to the and products.
- (4) Misrepresentations and Product Substitutions... There maybe occasions where there is a misund subtler points of the project. For example, it is understood that we are expected to follow the man your shingles in the case of a roofing project, but we want you to completely understand that there are sometimes impossible to actualize in the real world. Let us say, for example, that the instruction inches. That means that each course of shingles has 5 inches of material exposed to the weather. B real world is that "there is no such thing as a perfectly straight line in nature", and that goes even r roof deck is never without some swaying or swelling. It is impossible to install every course of sh Substitutions: Here too reality sometimes finds it impossible for us to follow the strictest letter of contract language says we will use "solar seal" to caulk the joint between the shingles and a mason supplier has run out of "solar seal" but has a product that is essentially the same. In such a situation right to sue us for double damages plus attorney's fees. If it turned out that one of our foremen bets substitution, the cost of such a "deviation from perfection" on our part would be determined by a run waive his/her right to seek double damages plus legal fees for such imperfections in our work on the will take place that could impact the warranty of purchased products.
- (5) Extra Layer(s)... If there are extra layers of roofing found, there will be an additional charge of x 10ft area) to remove those layers, unless a different rate is quoted to you within the body of the wr
- (6) Ice Dam Problems... There have been a couple of winters since our founding in 1975 when overloaded the system's capacity on a handful of our nearly 10,000 projects. In such circumstance and encouraged the owners to consider electric cables. We would only advise that if your roof turner required cables.
- (7) Miscellaneous... We will be responsible for fixing any damage to your inside that comes from a l errors on our part. However, we will not be responsible for such inside work if the leak was caused l e.g., faulty shingles, chimney, siding, gutters, etc. that we did not contract to fix. Likewise, we will r occurs in your house, given the many variables contributing to the emergence of mold, e.g., excessiv etc. Before work begins it is the homeowner's responsibility to cover any items in the attic and/or from dust & debris that may occur during roofing projects. The customer should also use their b pictures from the walls inside your home, which may come loose during the installation.
