5. DESCRIPTION OF PROJECT:

Tell us what you want to do. Describe all proposed work including materials, design, and dimensions. Additional pages may be attached.

The proposed project consists of demolition of the rustic wooden bridge over the Locust Street ravine in Lake Park and re-construction of a similar style rustic wooden bridge in its place (see attached map for approximate location). The new bridge would look identical to the existing bridge (see attached Photo A) or similar to the original 1906 bridge (see attached Photos Bi and Bii). The dimensions of the current bridge (which would be the same dimensions of the new bridge are listed on the attached Statement of Work).

The existing circa 1970's bridge has reached the end of its useful life and currently poses a safety hazard in the park. The piers and grade beams have tipped in the downhill direction, and there is evidence of historical attempts to repair this with concrete blocks (see Photos C and D). The timber columns sit on concrete piers set in the bottom of the ravine (see Photos E and F). These piers appear to be shifting, and the timber columns and the beams, which span between the columns, are in poor condition or rotted. As a result, the deck drops to the south and the entire bridge tilts to the west. At both ends of the Bridge, the walking paths slope towards the bridge, which is putting pressure on and undermining the piers and grade beams. Because it is dangerous, Milwaukee County closed the bridge in 2016.

Lake Park Friends, on behalf of Milwaukee County will be undertaking this project, with Milwaukee County oversight.
