Greetings,

Milwaukee does not need, and never will need, a data center. This is a huge concern to our community, especially near Sherman Park. Milwaukee's north side already has a plethora of businesses closing, decreasing access to food and household goods.

Adding a data center will only add on to the hardship with air and water pollution, and an increase of prices for gas, electric, and water as we've seen in other cases around the country.

Milwaukee does not need this development. This development is only harming our community. The large corporations behind these data centers do not care about the people of Milwaukee's health, stability, or living conditions.

This email is to express extreme discontent and opposition against building a data center anywhere in or near Milwaukee County.

Thank you
