Subject: No Data Center in MKE!
Date: Friday, May 15, 2026 4:07:16 PM

Some people who received this message don't often get email from abigaiklug012@gmail.com. [Learn why this is important](#)

To those involved in the decision making process about this data center,

I am shocked and appalled this is even being considered. The ecological effects alone are intolerable to our city and our community. This data center will be a waste of clean water and cause harm to our beautiful natural areas, waters, flora, and fauna. They pollute surrounding areas. This is PROVEN. Why on earth are we allowing our most valuable resource to be harmed?

This also will raise energy costs in our city, which are already high. Families and citizens will struggle as a result of this. Property values near the center will plummet.

There should NOT be a data center built. It is clear this would benefit no one and cause irreparable harm.

You have a responsibility to this city to say NO to new data centers.

Thank you for taking time to read this email.
