NHTSA VEHICLE RECALL

The National Highway Traffic Safety Administration has issued 2 safety related recall notices that may apply to the above valued vehicle.

NHTSA ID: 14V447000**ISSUED:****NO. OF VEHICLES: 414,333**

Seats:Front assembly:Power adjust General Motors llc (GM) is recalling certain model year 2011-2012 Buick lacrosse, Regal and Chevrolet Camaro, as well as certain 2010-2012 Cadillac SRX, Chevrolet equinox and GMC terrain Vehicles, equipped with power height adjustable Driver and passenger seats. In the affected Vehicles, the bolt that secures the Driver's and passenger's power front seat height adjuster may fall out causing the seat to drop suddenly to the lowest vertical position. If the Driver's seat unexpectedly drops, the distraction and altered seat position may affect the drivers' control of the Vehicle, increasing the risk of a crash. GM will notify owners, and Dealers will replace the height adjuster shoulder bolts, free of charge. The manufacturer has not yet provided a notification schedule. Owners may contact GM Customer service at 1-800-521-7300 (Buick), 1-800-458-8006 (Cadillac), 1-800-222-1020 (Chevrolet), or 1-800-462-8782 (GMC). GM's number for this recall is 14271.

NHTSA ID: 11V511000**ISSUED:****NO. OF VEHICLES: 33,964**

Tires:Pressure monitoring and regulating systems General Motors (GM) is recalling certain model year 2012 Chevrolet equinox and GMC terrain Vehicles, manufactured from July 18, 2011, through September 6, 2011, for failing to comply with the requirements of Federal motor Vehicle safety standard number 138, "tire pressure monitoring system" (tpms). The tire pressure monitoring system is designed to illuminate the tire pressure warning light when the pressure in a tire is 25% below the recommended cold tire pressure. On these Vehicles, the light will not illuminate until the tire pressure is more than 25% below the recommended cold tire pressure. Underinflated tires can result in tire overloading and overheating, which could lead to a blowout and possible crash. The resulting crash could cause serious injury. Underinflated tires can also result in premature or irregular wear, poor handling, and poor fuel economy. GM Dealers will update the body control module free of charge. The safety recall is expected to begin on or about November 9, 2011. Owners may contact Chevrolet at 1-800-630-2438 and GMC at 1-866-996-9463.

MARKET VALUATION REPORT

VALUATION METHODOLOGY

Allstate has provided CCC the VIN (Vehicle Identification Number) of the loss vehicle and the vehicle owner's zip code, which determine the market(s) that CCC used in the valuation. Using this information, CCC searches its databases to find comparable vehicles in these markets. CCC's database includes vehicles for sale at dealerships that CCC has physically inspected, as well as dealer and private party advertised vehicle information from numerous resources including AutoTrader.com®. Allstate has also provided CCC with the configuration of the loss vehicle, including equipment, odometer, condition, maintenance, etc. Vehicles located are compared to the loss vehicle, and adjustments are made for differences such as model/trim, equipment, and odometer. The comparable vehicles are also adjusted for condition to a common condition baseline. Using the adjusted values of the comparable vehicles, CCC calculates the Base Vehicle Value.

The Base Vehicle Value is the weighted average of the adjusted values of the comparable vehicles based on the following factors:

- > Source of the data (such as inspected versus advertised)
- > Similarity (such as equipment, odometer, and year)
- > Proximity to the loss vehicle's primary garage location
- > Recency of information
- > Comparable vehicles used in the determination of the vehicle value are not intended to be replacement vehicles, but are reflective of the market value.

The Adjusted Vehicle Value is determined by adjusting the Base Vehicle Value to account for the actual condition of the loss vehicle and its other reported attributes, if any, such as refurbishments, after factory equipment, and unrelated prior damage.

Please review the information in this Valuation Detail to confirm the reported mileage, condition and to verify there are no missed options, added equipment or refurbishments, or other aspects of the loss vehicle that may impact the value.
