Greetings,

Please do not allow this data center to be built without accounting for the heightened demand on our city's overtaxed infrastructure and the economic and environmental hardships for our community.

We deserve transparency about the long term impact and solvency of this proposal, not more thoughtless handouts to tech without consideration of the human and environmental costs.

We cannot move forward as a city if we do not put an intentional end to these patterns of chewing through communities in order to pacify lobbyists and politicians.

Let's do better this time so we can progress with balance, intentionality, and bipartisan focus on our common good.

Sincerely,

Lindsay Loughrin
3303 N. 50th st.
