Porches

Traditional Porch Floors

Porch floors should be constructed of center matched or tongue-and-groove wooden flooring, which typically measures 2-1/4" wide by 3/4" thick. This flooring gives the porch a fine finished appearance. The joists, which are the structural framing members to which the flooring is attached, should always be run parallel to the house so that the floor boards can be installed perpendicular to the house. The porch floor should also be very slightly pitched away from the house. This method of construction for a porch floor will shed water and make the porch last longer.
