

Green Solutions Funding Agreement M03076P41

Good Hope Road Bioswales

Amendment One

This Amendment One is to Green Solutions Funding Agreement M03076P41 between the Milwaukee Metropolitan Sewerage District (District), 260 West Seeboth Street, Milwaukee, Wisconsin 53204-1446, and the City of Milwaukee, Department of Public Works (Milwaukee), 841 North Broadway, Milwaukee, Wisconsin 53202.

The District and Milwaukee amend **Section 3 Location of Project** to add additional project locations along Mill Road.

3. Location of Project

The Project is in the median of West Good Hope Road, between North 91st Street and North 107th Street, and along West Mill Road, between North 43rd Street and North 91st Street.

The District and Milwaukee amend the **Project Description** to add bioswales along Mill Road.

The West Mill Road bioswale project consists of constructing 16 bioswales between North 43rd Street and North 91st Street. The bioswales will have a cross section similar to the bioswales in the West Good Hope portion of the project and are anticipated to capture approximately 48,000 gallons of stormwater and to provide 70%-80% of TSS reduction. The West Mill Road Bioswale Project is estimated to cost approximately \$450,000. Milwaukee intends to complete both the West Good Hope Road and West Mill Road Bioswales in 2018.
