Subject: Please Vote No to Files #190159 & #190404 (Joy Farm TID 99)

Good Evening,

I urge the entire Common Council of the City of Milwaukee to vote no on files #190159 & # 190404. There are too many incorrect variables to the creation of TID 99. The original Affidavit for Zoning change for the property located at 7007 N. 115th st appears to be in question as there are tax taxes still owed from 2013 which can be found on the city website. I have been in contact with Sarah Toomsen who has the title of Manager of Planning and Development. From a conversation via phone call, Western Building supplies representatives have yet to contact the County Parks to request extending a sanitary sewer for review and approval through their land utilization process. Upon having a conversation and email with David Hanson who is the Southeast region redevelopment specialist, Western Building supplies has also not been in contact with the Wisconsin DNR as they may need to submit a NR 718 soil management plan as the development will be excavating more than 100 cubic yards of soil. This is a very large concern with the community contaminated soil from this property could potentially pollute a major natural resource in the City of Milwaukee. I believe the largest and most apparent issue is the simple fact that a large portion of constituents in this area have expressed opposition for some of the above mentioned reasons along with many other issues that they feel will undoubtedly affect the surrounding community's quality of life. Shouldn't elected officials represent their constituents no matter their personal views on a subject? Do the constituents really have to go through legal litigation just to have their

opinions heard and to be represented? I am absolutely opposed to the zoning change and creation of Joy Farm TID (TID 99). Is development good for the community? I believe it is, if done legally and correctly. Please take into account the many lives that will be affected negatively if you vote yes on these said issues.

Thank You,
Nick McVey

WI DNR Soil Management NR 718 Requirements

Hanson, David L - DNR [David.Hanson@wisconsin.gov]

Hi Nick,

I understand you have some concerns with a proposed development. The developer may need to submit a NR 718 soil management plan depending on whether they are excavating and managing contaminated soil. They do not need approval from the DNR if they will be taking it to a licensed landfill for disposal. They are required to submit a soil management plan for DNR approval if they will be excavating more than 100 cubic yards of contaminated soil and disposing of that material either on or off-site, instead of at a licensed landfill. If you feel they are excavating contaminated soil, I would be happy to reach out to their consultant.

Thanks,

David
