Chief's Directive: June 26, 2014

Form PM-8E
11/09

**MILWAUKEE POLICE DEPARTMENT
MEMORANDUM**

Date: JUNE 26, 2014

TO: ALL DISTRICTS, DIVISIONS AND BUREAUS

FR: CHIEF EDWARD FLYNN 

RE: PRIORITY ONE CALLS – MANAGEMENT OF RESOURCES

This directive is a reminder regarding expectations and protocols related to the handling of dispatched calls for service. As we enter the summer months, I want to be sure we are appropriately managing our workload and efficiently balancing our dual roles of providing proactive police services in our neighborhoods and responding to citizen-generated calls for police service.

My first-term swearing-in speech in January 2008 included this passage following my explanation of our mission:

“We shall reduce the levels of fear, crime and disorder in the City of Milwaukee. Our measure of success will not be the number arrests. Our measure of success will not be the number of traffic citations issued. Our measure of success will not be our response time to non-emergency calls. Our measures of success will be the reduction of crime, fear and disorder in Milwaukee.”

I want to draw your attention to the following phrase: **non-emergency calls**. I repeat: our measure of success will not be our response time to non-emergency calls. This means that one of our measures of success is indeed our response time to emergency calls. Beginning with next week's Compstat, we will be including metrics related to response time to Priority 1 calls by district and shift.

We have a prioritization system for triaging and dispatching our calls for service. Priority 1 calls are subordinate only to Emergency Assistance calls from a fellow officer. Any squad can be preempted from an assignment to a Priority 1 call.

Officers are required to follow the directives of dispatchers. When officers are dispatched to a Priority 1 call, they will respond to that call as quickly and safely as possible.

Sergeants and lieutenants are required to monitor the radio and efficiently manage your police officers resources.

Technical Communications is responsible for prioritizing calls. A Non-Compliance Report will be completed and distributed each time there is a failure to comply with a dispatcher's directive.

Everyone is responsible for striking the real-time balance of providing both proactive and reactive police service. Everyone will be held responsible for their decision making.
