Re: Resolution #130115 regarding Incentive Based Wellness Program

The following have been part of the Wellness and Prevention Labor Management Committee, for the most part, since 2010. This group helped to define what the City's wellness effort would include, who the vendor or partner for the program would be, and continues to monitor and review the services of Workforce Health. This group was actively engaged in making the recommendation for the next phase of the wellness effort, an outcome based incentive program.
