**Attachments:** SAL notes for HPC 11-4-19.pdf

Greetings Carlen and Linda:

As you know, my Solar Energy System is in many ways a case of first impression for the HPC, and you've kindly allotted me the last slot of the day for Monday's HPC hearing to allow adequate time for consideration (thank you!).

I will be making a brief presentation at Monday's hearing and I thought out would be helpful if the Committee Members had a copy of my outline notes so they can follow along.

Accordingly, could you kindly please distribute these to the Committee Members and could you please bring enough printed hard copies to the hearing so each attending member has one.

Of course I do not expect the members to have read this before hand but I do want them to be able to follow along with my presentation.

Apologies for the short notice, but I only received the Staff report Thursday afternoon.

Also, I've already sent you some photos screenshots from the NPS website so that the AV person can have these displayed during my presentation. Since I didn't hear otherwise, I'm assuming that will be possible (in that email I had requested a shout-out if not doable).

Best regards,

Susan La Budde
