RE: Appeal Hearing for June 24, 2026 10:AM

This matter is about the vehicles owned by us towed away by the City from behind these properties 3373 -77 and 3381 N King Dr because they were said to be parked beyond our property lines. Such practices and incidents are documented in the book of The Color of Law. That matter cost us time and resources that have complicated our ability and resources to address the 3373 -77 code violations. This was not an act of good faith by the City but was like an act of imitation of one with power against one with limited resources based upon some developments around us at this time.

Please see the photos attached 4 related to this matter, commercial property located at 3373 -77 N Dr .M. L. King Drive Milwaukee and the property immediately to the north of it fenced off as a matter of safety due to falling bricks.

And two (2) pictures of the rear of these properties which are on 6th Street between Concordia to the south and Keefe Avenue to the north.

We ask your reconsideration of that the fines imposed related to the delay regarding the building code violations be dropped and the return of the cost related to the towing and storage of the vehicles while in possession of the City be returned. And or there be some significant reductions of these fines so as not to contribute to continuing "laws and procedures" that have disproportionately resulted in many African Americans losing property ownership.

Respectfully Freida Webb & Family
