To whom it may concern,

I am a Milwaukee resident and I'm emailing to provide my testimony on the Data Center that's proposed to be built on 60th and Capitol Drive.

I am not in support of this proposal. This project will pose dangerous threats to the environment, especially Lake Michigan. Not only would it use extensive amounts of water, it would cause harm to the ecosystems that are dependent on the water for survival. The amount of pollution alone can pose serious risks to both people and animals. With the amount of energy and water consumed by these types of facilities, residents, schools, clinics and businesses alike will have inadequate access to these resources.

Another element that I find concerning is how Milwaukee continues to reinforce its segregation by neglecting and negatively impacting lower income, predominantly Black communities. By placing the facility on 60th and Capitol, you continue to put Black and Brown communities in unfavorable conditions. Energy and water bills will rise, air quality will reduce, and proper access to clean water will be nearly destroyed. The quality of living, air, and water will all go down for the communities that are already at a systemic disadvantage. This in itself is a form of injustice.

What if instead of spending our tax dollars and wasting time on useless AI facilities, you uplifted resources and infrastructure that people actually need?

Thank you for your time and consideration.
