THIS AGREEMENT, By and between H-D Milwaukee, LLC, an affiliate of Harley-Davidson, Inc., hereinafter known as "Developer", and the City of Milwaukee, a municipal corporation, hereinafter known as "City";

#### WITNESSETH:

IN CONSIDERATION of the sum of One Dollar (\$1.00) to each party in hand by the other, receipt whereof is hereby acknowledged, and in further consideration of the covenants and agreements hereinafter contained.

WHEREAS, The Developer plans to develop the land bordered by South 6<sup>th</sup> Street on the west, the Menomonee River on the north, and the South Menomonee Canal on the east and the south (the "Site"); and

WHEREAS, The development will consist of the Harley Davidson Museum and related retail, office, and commercial facilities; and

WHEREAS, The Developer has entered into a Development

Agreement with the City which outlines the terms and conditions of the museum project; and

WHEREAS, In order for the Developer to undertake the museum project, a City water main located along the site's eastern border must be relocated and several sections of water main within the site must be abandoned; and

WHEREAS, In accord with the Development Agreement, the Developer has requested a subagreement providing for the water main relocation; and

WHEREAS, The requested water main relocation could be accomplished under the terms of an Out-of-Program Agreement upon condition that title to the relocated water main, upon its completion, shall vest in the City of Milwaukee subject to conditions more fully hereinafter stated.

NOW, THE REFORE, In consideration of these premises and the mutual benefits herein accruing and for other good and valuable considerations,

IT IS AGREED, By and between the parties hereto that:

### 1. Funding Obligation

Developer agrees to provide all funds required for design, construction, and inspection of the water main improvements, easement preparation as may be required, and any related City work necessitated by the project.

## 2. <u>Water Main Improvements</u>

The following alterations will be made to the existing system of water mains located either on the site or within the adjacent South 6<sup>th</sup> Street and West Canal Street rights-of-way:

- a. Roughly 500 feet of 16-inch water main located in South 6<sup>th</sup> Street right-of-way south of West Canal Street will be relocated approximately 50 feet to the west.
- A section of 20-inch water main located north of the West Canal Street right-of-way and east of South 6<sup>th</sup> Street will be reconfigured to remove it from the development site.
- c. Approximately 450 feet of 6-inch water main located in West Canal Street right-of-way east of South 6<sup>th</sup> Street will be abandoned in place.

- d. Approximately 350 feet of 8-inch water main located in South 6<sup>th</sup> Street right-of-way north of West Canal Street will be abandoned in place.
- e. Approximately 500 feet of 8-inch water main extending easterly into the site from the northern end of the water main described in (d) above will be abandoned.

The estimated cost for the water main work is:

Design engineering	\$ 14,000
Construction engineering	52,000
(including fittings & materials)	
Construction contract	124,000
Total estimated cost	\$190,000

### 3. <u>Timing</u>

Relocation of the 16-inch water main in South 6<sup>th</sup> Street (2a above) will occur in 2005 and can be accomplished while the site continues to be actively used by DPW. Abandonment of the other water lines cannot occur until DPW vacates the site. This is anticipated to happen in February 2006. Developer agrees to provide a right-of-entry or similar right to the City and its contractors if water main abandonment work will be performed after City's conveyance of the site to the Developer.

## 4. Other Improvements

Developer agrees that any other utility and access improvements necessary to serve the site shall be its responsibility and shall be undertaken by Developer at its sole expense. Developer further agrees that the City shall review and approve plans for any work to occur in the public right-of-way. Permits necessary for any such work shall be obtained by Developer.

### 5. Private Utilities

Developer agrees that all private utility lines, if any, as necessary to provide telephone, communications, and electrical services to the development shall be installed underground, except where the City Plan Commission finds that such underground installations are not feasible.

### 6. <u>Design Engineering Deposit</u>

Developer shall deposit \$14,000 via a check made out to the City of Milwaukee to cover the cost of design engineering. No design work shall be started until this check has been provided.

# 7. <u>Construction Engineering Deposit</u>

Developer shall deposit \$52,000 via a check made out to the City of Milwaukee to cover the cost of construction engineering and all required fittings and materials. A contract for the water main improvements shall not be awarded until this deposit has been made.

# 8. <u>Funding Guarantee</u>

Developer shall provide an irrevocable Letter of Credit or other funding guarantee satisfactory in format to the City Attorney, in an amount equal to the estimated construction contract cost of the water main work (Estimate: \$124,000) prior to the award of any improvement contract.

The irrevocable Letter of Credit or other form of funding guarantee shall ensure that the Developer's bank or savings and loan will provide the required funds to cover the estimated construction contract cost of installing the applicable public

improvements and will, upon simple request by the Commissioner of Public Works and the City Treasurer, release same to City as required, all such funds to be furnished interest free.

A contract for the water improvements shall not be awarded until the Letter of Credit or other funding guarantee has been provided.

### 9. Actual Costs

It is understood and agreed that any actual cost in excess of amounts estimated herein will be billed to Developer upon determination that such excess costs have or will be incurred by City. It is also understood and agreed that if the City's actual costs of design or construction engineering are less than the deposited amounts, City shall refund the balance.

It shall be further understood and agreed that where
Developer funded work covered under the terms of this
Agreement does not proceed to the bid or contract state, the
City shall still retain a sufficient amount of the Developer's
engineering fund deposit to cover expenses incurred by the
City for engineering and plan preparation work commenced by
the City at the Developer's request.

# 10. <u>Inspections, Fittings & Materials</u>

Both parties agree that all materials furnished and all work performed hereunder shall conform to all regulations and specifications of the City of Milwaukee and its Commissioner of Public Works and shall be subject to inspection by and approval of inspectors and engineers furnished by the

Department of Public Works. All engineering, inspection, materials and fittings costs incidental to the installation of the public improvements covered by this Agreement shall be subject to the terms of this Agreement, the cost of such service when furnished by City being established as the wages of the person or persons engaged in such work plus all costs of overhead.

### 11. Ownership of Public Improvements

It is understood and agreed by both parties hereto that upon completion of the water main relocation, title to the relocated water main shall vest in the City of Milwaukee and that the City will accept the obligation of operation and maintenance in accordance with its standard practice. It is further understood and agreed that the abandoned water mains shall be taken over by the Developer. City shall cap the ends of the abandoned mains at the points of cut off.

#### 12. Building Permits

It is understood and agreed by both parties hereto that building permits for any planned structures to be served by the relocated water main shall not be issued until the Developer has provided the City with the Letter of Credit (or other funding guarantees) and cash deposits referenced in paragraphs 6, 7, and 8.

#### 13. Occupancy Permits

It is understood and agreed by both parties hereto that occupancy permits for any structure to be served by the relocated water main shall not be issued until all planned public improvements have been sufficiently completed so essential public utility services are provided to the structure.

# 14. <u>City Ordinances and Regulations</u>

It is further understood and agreed that this Agreement is subject to all City ordinances and regulations and nothing herein shall be deemed to waive or supercede such requirements. THIS AGREEMENT, drafted by the City of Milwaukee, shall be binding upon the Developer, its lessees, successors and assigns, and upon the City, its successors and assigns.

## DEVELOPER

IN WITNESS WHEREOF, the Develope to be signed and sealed this day of	veloper has caused this document
In Presence Of:	Developer
