Some people who received this message don't often get email from kyle.r.berndt@gmail.com. [Learn why this is important](#)

Hello,

It appears that you plan to approve the proposed computer data center at Midtown Center on 60th and Capitol at your June 29 meeting. This is something that I DO NOT support.

As I emailed before the last hearing -- **This data center DOES NOT have the support of city residents and neighbors.**

The proposed data center has NO upside for neighbors -- only corporations and billionaires. It will NOT benefit neighbors in any appreciable way.

The proposed data center WILL have downsides for neighbors. Noise pollution 24/7. Higher risk of blackouts. Less remaining real estate to be used by community members for their community.

I implore you to NOT APPROVE this proposed computer data center.

I will be there in-person to have my voice (and that of my neighbors) heard. If you vote YES, you will know that you are not representing the good of the city residents and neighbors.

Thank you,
Kyle Berndt
