As you have notified me now that that is the plan, you're fine. Please match the profile of the siding under the aluminum. Do not match the aluminum profile.

I haven't written up the roof approval yet, so I will add the cedar siding to it before sending it out.

Do we need to get approval for the siding to be replaced?
If we're replacing with Cedar?

Or are we good to go with that?

Thanks in advance!

It will be another fine that will continue until compliance and go to court, if necessary, like the current scenario.
