Monitor  
for  
leakage

ge and fully repair as necessary by a qualified contractor. Heavily caulking/mastic often means there has been water intrusion or other issues.

Verify and repair as needed.

Chimney Recommendations:

We recommend a CFI Certified level II camera evaluation.

The chimney may need a liner. Seek further evaluation by a chimney specialist. Seek further evaluation by a chimney specialist or mason. Seek further evaluation by a chimney specialist or mason. Within the last 30-40 years, when what's called an appliance is installed like a gas hot water tank, gas furnace or boiler, a liner is required for safety and correct drafting outside of spent fuel gasses like CO and other petro chemicals and benzene into the basement or living area. Backdrafting into the building is a known physics problem of rise, lift and drafting almost four stories up to exhaust outside. These chimneys here were designed for coal use with no modifications evident. Evaluate and correct for good function and safety. In the State of Wisconsin and sometimes in Milwaukee this need of a metal liner as pictured is a basic safety requirement when a permit is correctly obtained for any gas appliance chimney connection and professional installation, as is the correct sizing of gas piping service to the appliance(s). Verify permits for correct installation, good function and safety as prudent and needed for more assured protection of all concerned.

See note 126 and 165 in Reference Addendum.

Observations are not a warranty or guarantee. Ask the seller for any history of leaks/water penetration and related concerns.

## *Outbuilding Exterior*

### Outbuilding Exterior

Green or red greenhouse, it appears.

### Outbuilding Exterior Limitations

#### Limitations/Exclusions

Restricted access to the exterior of the North side of building. Restricted access to the exterior of the East side of building. Restricted access to the exterior of the South side of building. Restricted access to the exterior of the West side of building.

Exterior Siding Type and Trim: (5)(a) 1.,  
(5)(a) 2.

#### Inspection Limitations

Bushes restrict inspection. Vines/Shrubs restrict inspection.

Type Wood.

### Condition

Older/worn, Remove debris, soil, and vegetation off garage siding suggested as prudent to protect the structure. Peeling paint. Possible lead hazard. See note about lead in the "General" section at the beginning of this report. Loose siding. Missing sections/corners, Holes/gaps. Suggest sealing to prevent pest/water infiltration. Siding is too close to soil. All framing and siding should not be in contact with soil outside the building. Moisture damage, rot, and mold can result. The ideal clearance is a minimum of 6 inches. Siding should not be subjected to splashing water from gutters or downspouts. Deterioration: Typical for age. Significant deterioration. Consult carpenter or siding contractor. Seek further evaluation by a siding contractor.

### Foundation

Deterioration of block/brick, Gaps large enough for pests to enter building observed. Suggest patching or sealing gaps. Movement, walls lean.

## Fascia and Soffits: (5)(a) 6.

---

### Limitations

Recent paint. *Recent paint may conceal evidence of past or present conditions, such as water staining, deterioration, or cracking. Suggest asking owner/occupant for history.*

### Condition

Older/worn, Damaged fascia, Damaged soffit, Typical deterioration for age, Major deterioration. Consult carpenter or siding contractor.

## Exterior View of Outbuilding Windows/Doors

---

### Limitations

Recent paint. *Recent paint may conceal evidence of past or present conditions, such as water staining, deterioration, or cracking. Suggest asking owner/occupant for history.*

### Condition

Older/worn, Damaged glass/screens, Typical deterioration for age, No cap flashing visible. Maintain caulk.

## Outbuilding Grading

---

### Grading

Bushes/vegetation restrict inspection, Current landscaping restricts proper drainage, Low or flat areas: Various

locations, Slope dirt away from building (add soil) 1" per foot for 6 ft.

Vegetation

Trees/Shrubbery too close to garage, Suggest trimming or removing.

Outbuilding Gutters: View From Ground

None, Gutters need repair or replacement.

Outbuilding Downspouts

Roof Drainage

None, Missing sections, Downspouts need repair/replacement.

Outbuilding Exterior Electrical

Power Feed:

Unknown, if at all.

Outbuilding

Interior Limitations

No access to interior of garage.

Attached/Detached:

Detached.

Structure:

Wood frame: Leaning, Bowed/sagging roof.

Roof (See Roofs)

Ceiling and Walls, Fire Wall (where applicable): (8)(a) 5.

Unknown.

Windows: (5)(a) 3.

Older/worn, Fixed, Not tested, Deterioration, Cracked/broken panes.

## Living Space

INTERIORS. (a) A home inspector shall observe and describe the condition of all of the following: 1. Walls, ceilings and floors. 2. Steps, stairways, balconies and railings. 3. Counters and all sink base cabinets. 4. A random sample of doors and windows. 5. Separation walls, ceilings, and doors between a dwelling unit and an attached garage or another dwelling unit. 6. Signs of water penetration into the building or signs of abnormal or harmful condensation on building components.

(b) A home inspector is not required to observe any of the following: 1. Paint, wallpaper, and other cosmetic finish treatments on the interior walls, ceilings and floors. 2. Carpeting. 3. Draperies, blinds or other window treatments. 4. Household appliances. 5. Recreational facilities or another dwelling unit.

## General Areas

Exterior Doors: (8)(a) 4.

Older/worn, Metal/Fiberglass: Appears functional, Older/worn, Typical for age, Worn finishes.

Electrical: (7)(a) 6., 7., 8.

See Electrical section.

## Attic

INSULATION AND VENTILATION. (a) A home inspector shall observe and describe the condition of all of the following: 1. The presence or absence of insulation in unfinished spaces. 2. Ventilation of attics and foundation areas. 3. Kitchen, bathroom, and laundry venting systems.

(b) A home inspector is not required to observe any of the following: 1. Concealed insulation. 2. Venting equipment which is integrated with household appliances.

Correct any sources of warm air leaks/humidity from interior HVAC conditioned spaces.

## Ventilation: (11)(a) 2.

Passive Ventilation Type:

None visible, From exterior.

Condition:

Minimal ventilation. Contact Wisconsin's Focus on Energy Program for a Building BPI Certified Analyst to determine attic ventilation/insulation needs and design recommendations. See <https://focusonenergy.com/> for more information.

## Roof Framing/Sheathing

Limitations:

Roof structure not visible: 100%.

Condition:

Some sagging rafters observed.

Moisture Penetration: (8) (a) 6, (4) (a) 5.

Unknown.

See note 171 in Reference Addendum.

## *Electrical*

**ELECTRICAL SYSTEMS. (a) A home inspector shall observe and describe the condition of all of the following:** 1. Service entrance conductors. 2. Service equipment, grounding equipment, main over current device. 3. Main and distribution panels, including their location. 4. Amperage and voltage ratings of the service, including whether service type is overhead or underground. 5. Branch circuit conductors, their over current devices, and the compatibility of their ampacities and voltages, including any aluminum branch circuit wiring. 6. The operation of a representative number of installed lighting fixtures, switches and receptacles located inside the house, garage and any exterior walls. 7. The polarity and grounding of all receptacles within 6 feet of interior plumbing fixtures, in the garage or carport, and on the exterior of inspected structures. 8. The operation of ground fault circuit interrupters. 9. The functionality of the power sources for smoke detectors.

**(b) A home inspector is not required to do any of the following:** 1. Insert any tool, probe or testing device inside the panels. 2. Test or operate any over current device except ground fault circuit interrupters. 3. Dismantle any electrical device or control other than to remove the covers of the main and auxiliary distribution panels. 4. Observe low voltage systems, telephones, security systems, cable TV, intercoms, or other ancillary wiring that is not a part of the primary electrical distribution systems. 5. Measure amperage, voltage or impedance. Inspect or test a built in vacuum system.

### Electrical Service Information

Limitations:

No access to panel.

Ground: (7) (a) 2.

Grounding path not verified.

Electrical service size/capacity noted is determined by a visual inspection only. See note 172 in Reference Addendum.

### Electrical: (7)(a) 6.,7.,8.

Change any two prong receptacles/wiring to provide third prong grounding. See note 173 in Reference Addendum. GFCI: (7)(2) 2. We recommend adding GFCI's for kitchen/bath/crawlspace/exterior/garage/pool circuits (or any wet environment requiring electric power). Lack of GFCIs at these locations is not generally considered "grandfathered". Unable to view wires inside wall to determine wire type or cause of open ground.

Verify that there is no old wiring without a ground (such as knob and tube) now as prudent.

## Recommendations

Knob and tube wiring may well be present. Review with a licensed electrician and insurance and loan underwriters now. Knob and tube wiring is an old style of wiring that does not have a ground. Some insurance companies will not insure homes with knob and tube wiring.

Recent updates present. Check to see if there are any open permits for this work to verify completion.

Modern/recent electrical service installation. Verify whether there is any service warranty offered. If exists.

All electrical concerns of any type are potential safety hazards and should be evaluated/repaired immediately by a licensed electrician.

## Basement/Foundation

FOUNDATIONS. A home inspector shall observe and describe the type and condition of the foundation.

COLUMNS (see Structure section). A home inspector shall observe and describe the type and condition of columns.

FLOORING SYSTEMS. A home inspector shall observe and describe the type and condition of flooring systems.

(If crawlspaces are present, see Crawlspace section. If utility sink is present, see Plumbing or Laundry sections. See Electrical section.)

Inspection is limited to visible areas only.

## Foundation: (1)

### Cracks/Fractures:

See note 133 in Reference Addendum.

IT IS IMPOSSIBLE TO PREDICT THE SEVERITY OR FREQUENCY OF BASEMENT SEEPAGE ON ONE VISIT. See note 135 in Reference Addendum.

## Foundation Drainage

### Drain Tiles:

No evidence of the presence of a drain tile system. Unable to determine with certainty whether or not there is a drain tile system present. *Exterior grading and protection from surface water is very important. Expect some dampness and seepage depending on weather conditions.*

Footings and drain tiles are not visible for inspection. See note 136 in Reference Addendum. This inspection is limited to the visible exposed areas only. Some walls and areas may be covered by finishes, storage, or painted/covered obscured surfaces. Drain tile systems are buried under the cement floor and underground and are not visible for inspection, therefore the existence or effectiveness of any drain tile can not be physically determined. Future performance of a basement cannot be predicted. Consult owner/occupant to confirm a dry basement history.

## Recommendations

Efforts should be made to maintain and correct all sources of exterior water/soil pressure with proper grading (slope of the ground), gutters, and downspouts.

### *Main Plumbing Services*

**PLUMBING SYSTEMS.** (a) A home inspector shall observe and describe the condition of all of the following: Interior water supply and distribution system, including piping materials, supports, fixtures, faucets, functional flow and drainage, leaks and cross connections. Interior drain, waste and vent systems, including traps, drain, waste, and vent piping, piping supports and leaks. Hot water systems, including water heating equipment, normal operating controls, automatic safety controls, and the exterior surfaces of chimneys, flues, and vents. Fuel storage and distribution systems, including interior fuel storage equipment, supply piping, venting, supports, and leaks. Sump pumps. A home inspector shall operate all plumbing fixtures, including their faucets and accessible exterior faucets attached to the dwelling unit.

(b) A home inspector is not required to do any of the following: State the effectiveness of anti-siphon devices. Determine whether the water supply and waste disposal systems are public or private. Operate automatic safety controls or sump pumps equipped with internal or water dependent switches. Operate any valve except water closet flush valves, fixture faucets and hose faucets. Observe water conditioning systems, fire and lawn sprinkler systems, on-site water supply quantity and quality, on-site disposal systems, foundation drainage systems, or spas. Observe the interior of flues, chimneys and vents, or solar water heating systems. Observe any exterior plumbing components such as water mains or swimming pools. Determine water temperature. Determine the proper size, design or use of plumbing materials.

### Service Line and Main Water Shutoff:

(6)(a) 1.

#### Material:

Possible multiple Lead services, See <https://city.milwaukee.gov/WaterQuality/LeadandWater#.W5vi7uhKjIU> for information and recommendations. Verify as prudent.

Plumbing (water and gas) supply valves are not operated during inspection.

An important part of building ownership is monitoring piping and fixtures for leakage so that you can promptly repair any issues as they arise.

### *Water Heaters*

#### Water Heater #1

Limitations:

Unknown.

Flue Pipe: (6) (a) 3.

Verify length of metal vent piping to service chimney flue for gas water heaters as prudent, and correct function. See backdrafting diagram for evidence of this occurring.

F018

Testing of safety devices is beyond the scope of this inspection.

## Furnaces

HEATING SYSTEMS. (a) A home inspector shall observe and describe the condition of all of the following within a permanently installed heating system: 1. Heating equipment and distribution systems. 2. Normal operating controls and energy source. 3. Automatic safety controls. 4. Exterior surfaces of chimneys, flues and vents. 5. Solid fuel heating devices. 6. The presence of an installed heat source in each room.

(b) A home inspector shall operate the systems using normal operating controls and open readily accessible access panels provided by the manufacturer or installer for routine homeowner maintenance.

(c) A home inspector is not required to do any of the following: 1. Operate heating systems when weather conditions or other circumstances may cause equipment damage. 2. Operate automatic safety controls. 3. Ignite or extinguish fuel fires. 4. Observe the interior of flues, fireplace insert flue connectors, humidifiers, electronic air filters, or the uniformity or adequacy of heat supply to the various rooms. 5. Observe a heat exchanger unless it is readily observable and normally accessible to an occupant of a dwelling unit.

## Heating System: Forced Air Furnace #1

**Location:** Unknown.

**Manufacturer:**

**Age:**

**Services:**

**Type:** (9)(a) 1.

**Fuel:** (9)(a) 2.

Seek professional service annually as regular tune ups help to prolong the unit's life expectancy and support safe and reliable function. Testing of safety devices is beyond the scope of this inspection.

## *Air Conditioning*

CENTRAL AIR CONDITIONING. (a) A home inspector shall observe and describe the condition of all of the following: 1. Cooling and air handling equipment, including type and energy source. 2. Normal operating controls. 3. The presence of an installed cooling source in each room.

(b) A home inspector shall operate the systems, using normal operating controls, and open readily accessible access panels provided by the manufacturer or installer for routine homeowner maintenance.

(c) A home inspector is not required to do any of the following: 1. Operate cooling systems when weather conditions or other circumstances may cause equipment damage. 2. Observe non-central air conditioners. 3. Observe the uniformity or adequacy of cool-air supply to the various rooms. 4. Operate electronic air filters. 5. Observe the pressure of the system coolant or determine the presence of leakage. 6. Test the electrical current drawn by the unit.

## AC System

**Location:** Roof.

**Manufacturer:**

**Age:**

**Services:**

**Type:** (9)(a) 1.

**Fuel:** (9)(a) 2.

Seek professional service annually as regular tune ups help to prolong the unit's life expectancy and support safe and reliable function. Window A/C units are not inspected.

## *Crawlspace*

## Crawlspace

Visibility and Limitations:

Unknown.

IT IS IMPOSSIBLE TO PREDICT THE SEVERITY OR FREQUENCY OF BASEMENT SEEPAGE ON ONE VISIT. See note 135 in Reference Addendum.

Footings and drain tiles are not visible for inspection. See note 136 in Reference Addendum. This inspection is limited to the visible exposed areas only. Some walls and areas may be covered

by finishes, storage, or painted/covered obscured surfaces. Drain tile systems are buried under the cement floor and underground and are not visible for inspection, therefore the existence or effectiveness of any drain tile can not be physically determined. Future performance of a basement cannot be predicted. Consult owner/occupant to confirm a dry basement history.

## *Heating and Cooling*

**HEATING SYSTEMS. (a) A home inspector shall observe and describe the condition of all of the following within a permanently installed heating system:** 1. Heating equipment and distribution systems. 2. Normal operating controls and energy source. 3. Automatic safety controls. 4. Exterior surfaces of chimneys, flues and vents. 5. Solid fuel heating devices. 6. The presence of an installed heat source in each room.

**(b) A home inspector shall operate the systems using normal operating controls and open readily accessible access panels provided by the manufacturer or installer for routine homeowner maintenance.**

**(c) A home inspector is not required to do any of the following:** 1. Operate heating systems when weather conditions or other circumstances may cause equipment damage. 2. Operate automatic safety controls. 3. Ignite or extinguish fuel fires. 4. Observe the interior of flues, fireplace insert flue connectors, humidifiers, electronic air filters, or the uniformity or adequacy of heat supply to the various rooms. 5. Observe a heat exchanger unless it is readily observable and normally accessible to an occupant of a dwelling unit.

**CENTRAL AIR CONDITIONING. (a) A home inspector shall observe and describe the condition of all of the following:** 1. Cooling and air handling equipment, including type and energy source. 2. Normal operating controls. 3. The presence of an installed cooling source in each room.

**(b) A home inspector shall operate the systems, using normal operating controls, and open readily accessible access panels provided by the manufacturer or installer for routine homeowner maintenance.**

**(c) A home inspector is not required to do any of the following:** 1. Operate cooling systems when weather conditions or other circumstances may cause equipment damage. 2. Observe non-central air conditioners. 3. Observe the uniformity or adequacy of cool-air supply to the various rooms. 4. Operate electronic air filters. 5. Observe the pressure of the system coolant or determine the presence of leakage. 6. Test the electrical current drawn by the unit.

## *Types of Systems*

Unknown.

Heating and cooling equipment, like any complex device such as a car or computer, may fail at any time for unforeseen reasons. Expect to perform regular seasonal maintenance, which may include some repairs.

## *Informational and Educational Comments*

### NOTICE: Items of Which to Be Aware

Informational notes including some of the building's routine care/typical upkeep needs. Consider further evaluation as desired/needed by a qualified professional:

#### **Exteriors**

##### Electrical

*Lighting: (7)(a) 6.*

Older/worn, Possibly some sodium vapor bright lighting is commonly not allowed in a neighborhood setting.

#### **Lots and Grounds**

Patio: (5)(a) 5.

*Limitations:*

Muddy open areas, may pool, setting.

Driveway: (5)(a) 7.

*Limitations:*

None???

Landscaping/Grading: (5)(a) 7.

*Grading:*

Current landscaping/retaining wall may restrict proper drainage, Low or flat areas: West, Various locations. Grading under deck slopes towards building or is flat and will not drain water away effectively. Slope brown dirt away from building 1" per foot for 6 feet in low/flat areas now and correct grading as necessary at all surfaces around the building. See note 111 in Reference Addendum. Ask yourself where the water is going to go: Into the basement or away from the building?

Suggest correcting grading concerns at walk.

#### **Chimneys**

##### Chimney

*Visibility and Limitations: (4)(a) 4.*

#### **Outbuilding Exterior**

##### Outbuilding Grading

*Grading*

Bushes/vegetation restrict inspection, Current landscaping restricts proper drainage, Low or flat areas: Various locations, Slope dirt away from building (add soil) 1" per foot for 6 ft.

#### **Main Plumbing Services**

Service Line and Main Water Shutoff: (6)(a) 1.

*Material:*

Possible multiple Lead services, See

<https://city.milwaukee.gov/WaterQuality/LeadandWater#.W5vi7uhKjIU> for information and recommendations. Verify as prudent.

#### **Water Heaters**

Water Heater #1

*Flue Pipe: (6)(a) 3.*

Verify length of metal vent piping to service chimney flue for gas water heaters as prudent, and correct function. See backdrafting diagram for evidence of this occurring.

## Upcoming Replacement Items

*Some items that appeared functional/intact at the time of inspection but are near/beyond the end of their designed useful and reliable life expectancy or otherwise showing signs that they may need replacement at any point due to age/wear. Anticipate and budget for replacement.*

### **Lots and Grounds**

Walkways: (5)(a) 7.

Mud /Dirt Trails

Mud trails.

### **Roof Surface(s)**

Pitched Roof

*Approx Layers: (4)(a) 1.*

See note 116 in Reference Addendum. Two asphalt layers and a wood layer observed, Three asphalt layers and a wood layer observed.

Flat/Low Slope Roof

*Recommendations:*

Expect to re-roof soon. Correct roof deficiencies to prevent damage to structure and finishes. Consult roofing contractor now for recommendations regarding maintenance needs, longevity, usefulness, and preservation.

### **Chimneys**

Chimney

*Flue: (4)(a) 4.*

Interior not inspected. No opinion offered. Damage/cracks/flaking/shaling noted at exposed flue tile at top of chimney. Flaking/shaling/cracked, Missing.

*Chimney Flashing: (4)(a) 4.*

Limited/obstructed view of flashing due to location/access. Chimney flashings are susceptible to leakage at any time. Ask the seller for any history of leaks/water penetration and related concerns.

Roofing mastic/tar sealant. These sealants are temporary and susceptible to leakage at any time. Ask the seller for any history of leaks/water penetration and related concerns, evaluate now, seasonally evaluate, and correct as needed. Step flashing not visible/verified. Temporary mastic/caulk/tar sealant observed.

Unconventional/curious materials. Expect water intrusion issues. Flashings unknown/unverified.

Evaluate for good installation and common maintenance needs. Sealed with roofing mastic/tar sealant. See note 120 in Reference Addendum. This could leak at any time. Monitor for leakage and fully repair as necessary by a qualified contractor. Heavy caulking/mastic often means there has been water intrusion or other issues. Verify and repair as needed.

### **Electrical**

Recommendations

Knob and tube wiring may well be present. Review with a licensed electrician and insurance and loan underwriters now. Knob and tube wiring is an old style of wiring that does not have a ground. Some insurance companies will not insure homes with knob and tube wiring.

Recent updates present. Check to see if there are any open permits for this work to verify completion. Modern/recent electrical service installation. Verify whether there is any service warranty offered. If exists.

*Plumbing*

Gas Piping

Location of Gas Shut Off:

The main gas shut off is located outside on the East side of the building.

## WHAT SHOULD NEIGHBORS DO IF THEY HAVE REASON TO BELIEVE THAT NUISANCE ACTIVITIES ARE OCCURRING AT A PROPERTY?

Depending on the severity of circumstances, your first action may be to ask the property owner for action. Many rental property owners' names, addresses and telephone numbers are listed at the DNS web site ([www.milwaukee.gov](http://www.milwaukee.gov)) at Property Data.

1. Call 933-4444 to report the nuisance. Be as detailed as possible. MPD tracks repeated calls for service and can use this information to determine whether or not the Chronic Nuisance Property Code was violated.
2. Keep a log of when the nuisance occurred (time, date, location, description of the nuisance). Include the name(s) of everyone you called (owner, MPD, etc.).
3. Forwarding your observations to the MPD may assist if the property has reported calls. This information will be relayed to the community liaison officer at each district. You can contact the community liaison officer in your police district for further information. Non-emergency phone numbers for each district are:

- ⊙ Dist. 1: 935-7213 (749 W. State St.)
- ⊙ Dist. 2: 935-7223 (245 W. Lincoln)
- ⊙ Dist. 3: 935-7233 (2333 N. 49th St.)
- ⊙ Dist. 4: 935-7243 (6929 W. Silver Spring)
- ⊙ Dist. 5: 935-7253 (2920 N. 4th St.)
- ⊙ Dist. 6: 935-7263 (3006 S. 27th St.)
- ⊙ Dist. 7: 935-7273 (3626 W. Fond du Lac)

4. Be as specific as possible in describing the nuisance.

## DOES THE CHRONIC NUISANCE PROPERTY CODE WORK?

The MPD reports a high degree of success. When property owners are presented with credible evidence of illegal activities on their property, most cooperate with the MPD to prevent its recurrence. Rental property where such activities do not occur is more profitable. Both the owner and the neighborhood benefit. A study showed that 81% of cases are resolved without any billing for service.

*"The only thing necessary for the triumph of evil is for good people to do nothing."*

*-Edmund Burke (Paraphrase)*

# CITY OF MILWAUKEE CHRONIC NUISANCE PROPERTY CODE

- What does the code say?
- What should neighbors of a chronic nuisance property do?
- How to make a complaint
- How does it work?
- Nuisances that trigger a violation
- Advice for Property Owners
- Methods of Appeal

City of  
Milwaukee  
Department of  
Neighborhood  
Services

## **MILWAUKEE'S CHRONIC NUISANCE PROPERTY CODE**

**What is it all about?**

Property where nuisance activity occurs regularly is a blight on the whole neighborhood. The nuisances frighten away law abiding residents, discourage reinvestment and consume police and other city services. Responsible property owners can and usually do take steps to discourage those that cause such behaviors from occupying their buildings. The Chronic Nuisance Property Code says to property owners, in effect, "If you do not take action to try to stop these nuisances from recurring, then you and not the taxpayers will pay the cost of the police that must respond to your building." Passed into law in early 2001, the code is having an effect on reducing the problems where it has been used.

### **WHAT DOES THE CODE SAY?**

When the Milwaukee Police Department [MPD] determines that three or more nuisance activities have occurred at a property within a 30-day period, or two drug dealing, firearms, violent or other serious crimes occurred within a one-year period, they can notify the owner and request a plan to stop it from continuing. If the owner does not respond or fails to carry out the plan, the cost of all future MPD services related to responding to nuisance activities at the property will be placed on the taxes by the Department of Neighborhood Services [DNS]. Citations up to \$5000 per nuisance activity may be issued after a property owner is billed three times for enforcement costs.

### **WHAT NUISANCES ARE INCLUDED?**

There are over 30 nuisance activities listed in the code including but not limited to loud music, loitering, illegal drug activity, harassment, disorderly conduct, battery, indecent exposure, prostitution, loitering, littering, keeping animals that disturb the peace and discharge of a firearm. A complete list is found in 80-10-2 of the Milwaukee Code of Ordinances.

### **WHAT TYPES OF PROPERTY ARE COVERED BY THE CODE?**

Both residential and commercial property.

### **WHAT DOES THE STATE LAW SAY ABOUT ACTIVITIES IN A RENTAL PROPERTY?**

Wisconsin Statute 704.05(3): The tenant cannot use the premises for any unlawful purpose nor in such manner as to interfere unreasonably with use by another occupant of the same building or group of buildings.

### **CAN THE PROPERTY OWNER APPEAL?**

Yes, the code provides for an appeal of a determination that the property is a nuisance and all related enforcement costs. Such appeals are heard by the Administrative Review Appeals Board.

### **DOES THE NUISANCE ACTIVITY HAVE TO RESULT IN A CONVICTION OR EVEN THE ISSUANCE OF A CITATION BEFORE IT COUNTS TOWARD THE 3-IN-30 DAY or 2-IN-1-YEAR LIMIT?**

No. The MPD only needs to have probable cause to believe that the nuisance activities occurred at the premises. Probable cause can be established by credible evidence such as MPD's own observation, physical evidence or credible documentation by neighbors.

### **WHAT SHOULD PROPERTY OWNERS DO IF CONTACTED BY THE MPD CONCERNING THE VIOLATIONS OF THIS CODE?**

Prepare and implement a course of action designed to abate the nuisance activity. For example, if criminals have been using bushes to hide in and then robbing those walking by, the plan should include trimming or cutting down the bushes. If a tenant has been given noise tickets and keeps a barking dog, the plan should include enforcing your statutory lease provisions concerning no illegal activity on the premises.

### **WHAT SHOULD PROPERTY OWNERS DO IF THEY ARE CONTACTED BY NEIGHBORS ABOUT SUCH NUISANCE ACTIVITIES?**

Take them seriously and respond in the same way that would be needed to solve the problem as if the contact was from the MPD. If neighbors are good enough to alert the owner of a problem, they will probably react positively to constructive action by the owner. If the owner fails to do so, the neighbors will probably be contacting the MPD as well as pursuing other remedies.
