Purpose

Background

The City of Milwaukee conducted three dockless scooter pilot studies in 2019, 2021, and 2022 – 2023, through its Department of Public Works. Based on the findings and results of these pilot studies, the City desires to enter into an Agreement whereby a private contractor will provide the City with dockless scooter rental operations.

Goals

1. Provide equitable transportation services

Dockless scooters can be deployed where the need is highest, providing transportation services where other options may be unavailable. Additionally, dockless scooters that accommodate people of varying abilities have the potential to improve access to dockless scooters for a wider customer base.

2. Increase transportation options

Dockless scooters have the potential to reduce reliance on motor vehicles and ride sharing services for short trips, decreasing congestion and air quality impacts. Dockless Scooters may also provide links to public transit, assisting with connectivity and solving the first-mile/last-mile problem.

3. Minimize impacts on access to the public right of way

Dockless scooter operators must show a commitment to keeping pedestrian ways, streets, and other public rights of way unobstructed by dockless scooters for other street users. Most importantly, dockless scooters must be parked and maintained in a manner that provides a clear path for people walking and maintains access to businesses, residential units, and other buildings.
